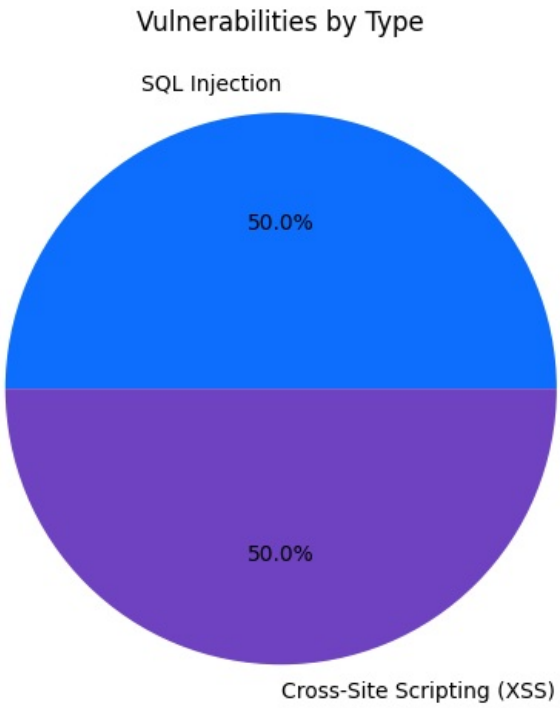
Severity Breakdown



Details

#	Vulnerability	Description	Endpoint
1	SQL Injection	Occurs when unsanitized input is embedded in SQL queries. Use parameterized queries or ORM frameworks.	http://172.16.47.198/membres.php?id=1
2	Cross-Site Scripting (XSS)	Allows attackers to inject malicious scripts into web pages. Prevent it using output encoding and CSP headers.	http://172.16.47.198/works.php
